Discussions

The team met to discuss the new achievements that have been made on the modelling task. Michael and Kelvin have been able to create a model using the Tube transformed data. So now the team can proceed to achieve the other unsolved objectives.

We decided to meet tomorrow, Monday, to go over the models together as a team and come up with suggestions for a way forward.

Also, Hakim is still having issues creating the required EC2 instance on AWS and will reach out to Kwazi again for some help.
